

# Muirhead Antiviral leather. Available now.

**Virus-resistant sustainable natural leather, providing best in class hygiene and customer protection.**

Muirhead Antiviral integrates ViralOff® technology from Polygiene AB at the manufacturing stage, delivering a sustainable natural material that eliminates 99% of bacteria and viruses from surfaces.

All the performance and sustainability benefits of our fine Scottish leather, with added antiviral properties.

Polygiene AB's ViralOff® technology is fully integrated during the leather manufacturing process to permanently protect.

An immediate solution to the challenges of Covid-19, enhancing the hygiene and protection of your leather for the future.

Our supplied marketing communications increase customer confidence in the safety and hygiene of your leather.

#### **SELF-DISINFECTING**

99% virus free within two hours of any viral contact, even without cleaning.

#### **ALWAYS WORKING**

Treatment is always-on, built-in to the leather as part of our sustainable manufacturing process.

#### **PROVEN PROTECTION**

Tested to reduce viruses by over 99% – including coronavirus, hepatitis, influenza A, norovirus and avian flu (ISO18184:2019).

#### **CUSTOMER CONFIDENCE**

Reassuring benefits are easily communicated.

#### **SPEEDS UP CLEANING**

Removes the need for any additional antiviral sanitising or cleaning of your leather.

#### **PROVEN DURABILITY**

Tested to 50,000 cycles on the Martindale abrasion rub test (ISO 12947-2).

#### **NO COMPROMISES**

The same reliable Muirhead supply chain, lead times and pricing as always.

#### **SUSTAINABLE BY NATURE**

The world's lowest carbon leather, treated using silver recovered from end of life electronic products.
